Modal Verbs

Modal verbs are used with other verbs to describe how likely something is to happen or to show how certain we are of something happening. For example:

One day the girl **might** be Queen.

The word 'might' is the modal verb. It indicates that the girl might be the Queen but it isn't definitely going to happen. Below is a list of modal verbs. Write the modal verbs onto the line below according to how strongly they suggest an event might happen.
