

Y6 Homework

Date Given: Mon 6th November

Date to be handed in/ tested: Mon 13th November

Maths Homework

Can children remember our work last half term on long multiplication? Please complete pages 15 and 16. There is an example on there too.

Times Tables

Well done to those children who completed their times table challenge last week. Lots of children completing it in less than five minutes too! Your new time to beat is your time from last week. These times table sheets do not need to come back into school. Keep them at home for all weeks leading up to Christmas. I will be checking the table in the back of the reading record to keep an eye on how well they are doing.

Mathletics

Please complete 20 minutes this week.

English Homework/ Science Homework

Next week we will be starting on our new English writing topic: non-chronological reports. We will be structuring our own reports on polar bears (linked to our science topic on adaptation and evolution) leading onto writing our own independent reports on WW2.

To help with next week's lessons, children need to be experts on polar bears! Knowing all from where they are found in the world, what they eat to how they're adapted to their environment.

Children need to complete the planning format on the back of this sheet. Children need to make notes on each aspect of the polar bear. Full sentences are not needed- bullet points will be fine. The more they know, the easier their writing will be! At least eight facts per box please.

Spellings- This weeks spellings will be based upon some tricky homophones we were learning last week. Learn these carefully and the context that they are used in. I will be changing the sentence in the test so you really do need to know which one to use.

If your child needs any help completing their homework, please send them to school with it **before** the hand in date. I will be more than happy to help.

Mrs Rae ☺
