

Year 1 Newsletter Summer 2 2015

This half-term our topic is 'Space' and where possible our work in class will follow this theme.

Science - we will be looking at sources of light and investigating what we can see in total darkness. We will also be looking at vertebrates/invertebrates and learning about growing plants.

English - we will be sharing books with a space theme, and writing character descriptions, settings, poems and stories all about aliens and planets.

Computing - we will use our 'we are storytellers' unit to make a talking book with a space theme.

Art/DT - the children will be using different media to make space pictures and will design and test their own rockets.

Geography - the children will learn about the Earth as a planet and learn about other planets in our solar system.
History - we will learn about space travel, particularly the moon landings and find out about Neil Armstrong.

Maths - this half-term we will be consolidating all that the children have learned this year.

Homework

Homework will come home each Monday to be completed for the following Monday. This will include spellings, maths and a topic or English based activity to be completed in their homework book.

Reading - please continue listening to your child read and commenting in their diary. It doesn't have to be a banded school book - home books, comics and reading challenges count too!
